

HOW TO BURN FILES TO CD OR DVD ON THE TOSHIBA LAPTOP.

Click on the Start button,
All Programs, Toshiba,
CD and DVD Applications,
Disc Creator

The Disk Creator window will open.
There are two sides (frames) in this
window, the left is the contents of your
computer, the right is the media you are
burning to, this frame will be empty at first.
Simply click and drag from the left frame to
the right frame to set up which files will be
copied.

As you move files to the CD/DVD there is a
meter to track how full your disk is
becoming. Once you have moved all your
files (or the disc becomes full), you will
need to burn them to
CD/DVD. Simply Click the
burn CD/DVD icon.

The program will prompt you to verify that the recording. Click YES.

As the CD/DVD is burned, you will see a progress report which
shows the amount of data being recorded and the elapsed time.
This window will remain open. If you click CANCEL, it will
stop the process, clicking the red X to close the window will
also terminate the recording process.

Once the process is complete, you have the option to burn
another copy. If you click YES, you will be prompted to insert
nother blank CD/DVD. If NO, you will be returned to the main
window.
